Languages: Typescript/Javascript, Java, Python, SQL

Frameworks: Angular, React, Bootstrap

Technology and DevOps: HTML/CSS, NPM, Git/Gitea, Node.js, Jenkins, SonarQube, Weblogic, Agile

EDUCATION

St. Lawrence College

Advanced Diploma (3 Year) - Computer Programming Analyst

Kingston, ON

Sept. 2015 – April 2018

WORK EXPERIENCE

IT Developer/Analyst (CS02), Digital Transformation

Canada Revenue Agency

Calgary, AB

Sept. 2020 – Present

- Led the front-end architecture and development as Project Lead of multiple Angular applications, ensuring performant, maintainable, and accessible user interfaces.
- Collaborated with designers to implement reusable components aligned with accessibility standards and organizational design systems.
- Delivered well-scoped features independently while actively seeking feedback, conducting code reviews, and mentoring junior developers.
- Applied modern front-end practices including unit testing, integration testing, and adoption of maintainable design patterns.
- Worked extensively with TypeScript, JavaScript, Angular, HTML/CSS, and Webform Factory to build scalable multi-page applications.
- Integrated build and DevOps tools (Jenkins, npm, SonarQube, Git/Gitea), contributing to CI/CD pipeline configuration and automated deployments.
- Participated in Agile product teams, contributing to backlog refinement, sprint planning, and iterative delivery cycles.
Supported platform-adjacent development including build automation, environment setup, and dependency management.

Junior IT Developer/Analyst (CS01), Digital Transformation

Canada Revenue Agency

Ottawa, ON

July 2019 – Sept. 2020

- Contributed to the development of Angular web applications, implementing front-end features with a focus on usability and performance.
- Supported enhancements to legacy Java Struts applications while resolving production issues.
- Assisted with code deployments across multiple environments, applying testing practices to ensure stability and quality.
- Collaborated with stakeholders and senior developers to refine technical solutions and project objectives.

IT Technologist**Ottawa, ON***Dymon Group*

Nov. 2018 – July 2019

- Led installation and maintenance of network infrastructure across six multi-story buildings.
- Provided technical support to employees, addressing hardware and software issues.
- Streamlined asset management processes, optimizing resource allocation.

Systems Development Tester**Kingston, ON***Ministry of Health and Long-Term Care*

Feb. 2018 – Aug 2018

- Designed and executed test plans for JCL batch stream updates within a DB2 and z/OS mainframe.
- Performed regression testing on web-based applications using SOAP protocols.
- Created and tested Java automated scripts for improved application reliability.

Drugs Systems Tester/Analyst**Kingston, ON***Ministry of Health and Long-Term Care*

May 2017 – Feb. 2018

- Fully designing and implementing a JSP based dynamic website using Rational Application Developer for internal use by vendors and upper-level management
- Testing and editing java-based automated scripts using the IBM Rational Suite
- Designing a test suite, writing test cases, and performing QA testing for 8 applications and databases for Microsoft Office 365 compatibility
- Building quality-of-life Visual Basic scripts for everyday efficiency
- Creating, debugging, and modifying Java automated scripts within IBM Rational Functional Tester for use within ministry web-based applications and test data creation

IT Service Desk Analyst**Kingston, ON***St. Lawrence College*

Sept. 2016 – Feb. 2018

- Assisting students with general computer technical issues and troubleshooting
- Creating incident tickets for known network issues
- Routinely opening, closing, and performing maintenance of labs within the school
- Signing out and keeping track of equipment to students

I&IT Systems Assistant**Kingston, ON***Ontario Ministry of Health and Long-Term Care*

May 2016 – Sept. 2016

- Assessed and approved over 300 technology related change requests
- Created and updated previous documentation on training materials and user guides
- Personally trained 5 people on workings of a new web tool within the government
- Updated records within the Configuration Management database
- Performed analysis and comparison of various Excel data reports
- Imported files, ran and exported reports, and posted/distributed reports to staff
